What the data says

South sold $357K but lost **$14.4K**. Its average discount is 5.0% against 4.9% overall, so the loss comes from what it sells: Technology lost $13.4K there, mostly telephones and communication.

May was the most profitable month: $67.0K profit on $306.6K sales. January and March barely broke even.

Tables are the biggest loss-maker ($7.2K lost on $194K of sales).

Corporate	$657,785	$54,444	8.3%	4.9%

What the data says

Lines discounted 9% or more lose money: a **-5.0%** margin on $275K of sales, against 16.2% when the discount is 2% or less.

Small Business customers return the best margin (16.3%); Corporate buys the most but keeps only 8.3%.

Capping discounts at 8%% is the quickest margin lever; South needs a look at its technology pricing.

How this report is governed

One source: the workbook is read once by a staging query; the invoice, customer and product tables are built from it, and the file path is the DataFilePath parameter.

Security: the Area Manager role shows each manager only their region (ManagerEmail in Dim_Region = USERPRINCIPALNAME). Sales Leadership sees every region.

Returns: only 11 of the 1,634 returned orders appear in the invoices, so returns are tracked here instead of on the main pages.

Watch list: 4 checks need attention at the source; nothing is hidden from the totals.

Freshness: Data refreshed 11 Oct 2026.
