Electronics Sales 2019

When and where should marketing spend go?

When & where | Products | Quality

Month: All | City: All | Product group: All

REVENUE	ORDERS	AVERAGE ORDER	PEAK MONTH	OCT–DEC SHARE
$34.49M	187.3K	$184	December	34%
9 US cities	209K units	revenue per order	$4.65M · 13% of the year	of the year's revenue

Revenue by month

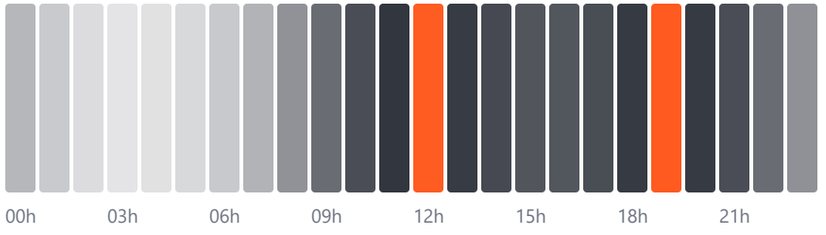

$M · December and the Q4 run-up highlighted

Q4 = 34% of revenue

Orders by hour of day

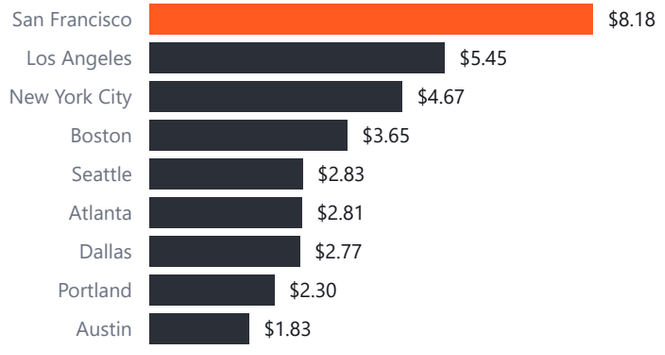

Distinct orders · darker = busier

Peaks at **12:00 and 19:00**; quietest at 03:00

Revenue by city

$M · top city highlighted

What the data says

December alone brings **$4.65M**, and October to December bring **34%** of the year, so Q4 budgets should be set by the summer.

San Francisco brings 24% of revenue, the largest of the nine cities.

Ads that start just before **12:00 and 19:00** reach people when they are ready to buy.

Electronics Sales 2019

Which products drive revenue, and which drive volume?

When & where | **Products** | Quality

Month: All | City: All | Product group: All

LAPTOPS
35%
of revenue · 4% of units

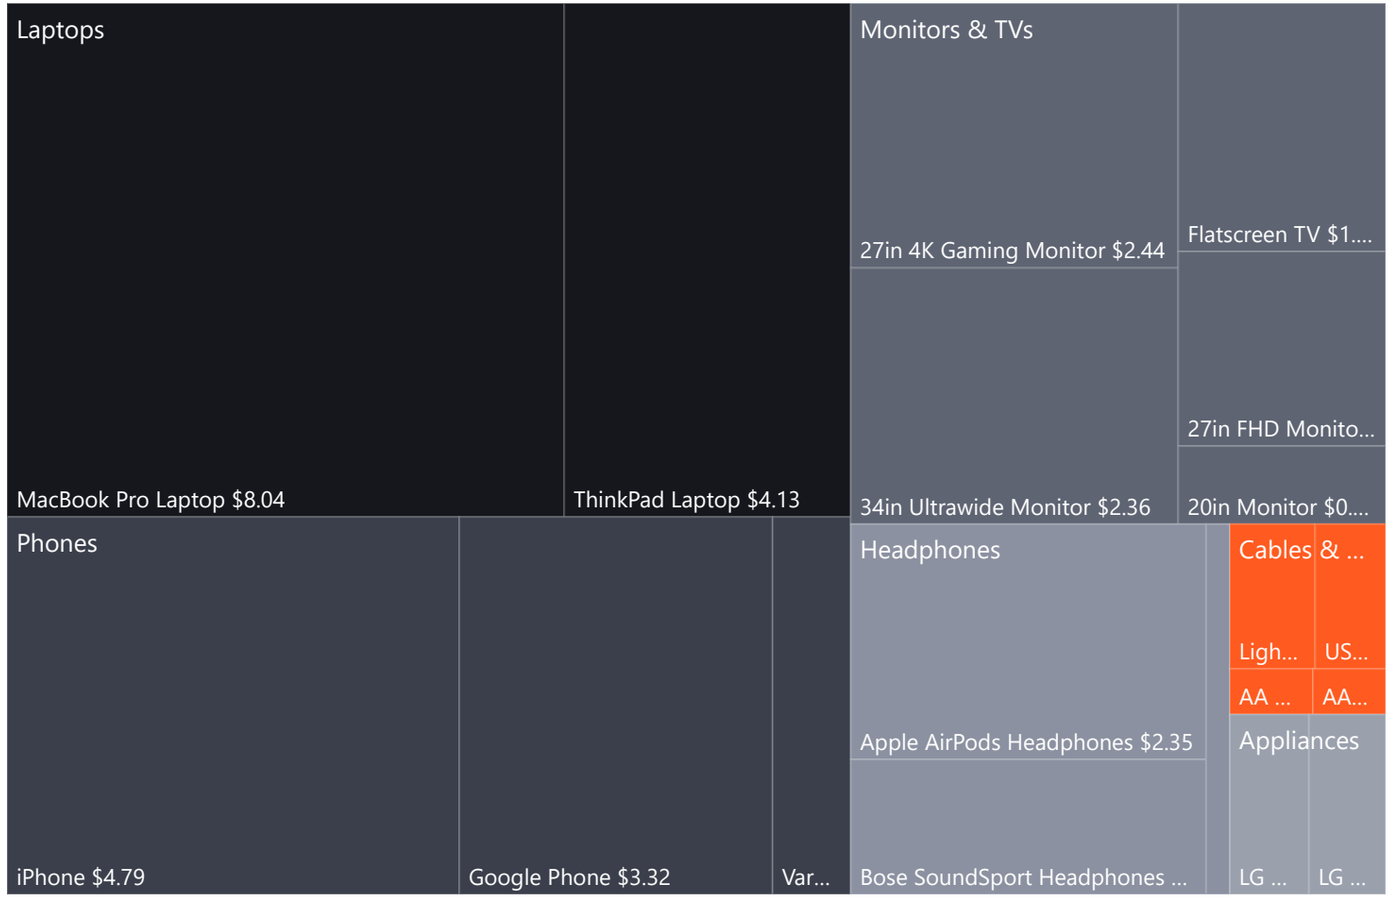

TOP PRODUCT
MacBook Pro Laptop
$8.04M revenue

MOST UNITS
AAA Batteries (4-pack)
31.0K units

BOUGHT TOGETHER
1,005
iPhone + Lightning cable orders

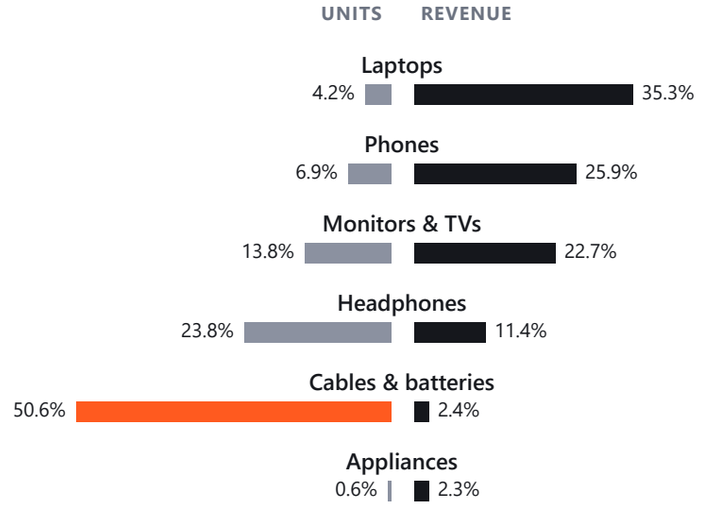

Revenue by product

$M · area = revenue, colour = product group

Share of units vs share of revenue

% of the year by product group

What the data says

Laptops are 4% of units but **35%** of revenue.

Cables and batteries are **51%** of units but only 2% of revenue. They bring traffic, not revenue.

1,005 orders already pair an iPhone with a Lightning cable, so a bundle raises the order value without new customers.

Data quality checks

Run on every refresh

Check	Rule	Result	Status
Order lines loaded	Row count of the CSV	191,067	Info
Distinct orders	Orders can have several lines	187,300	Info
Lines with unknown product	Every product exists in Dim_Product	0	Pass
Zero or negative quantity	Quantity > 0	0	Pass
Prices that differ from list price	Same product, same price	0	Pass
Orders spread over several cities	An order ships to one address	0	Pass
Lines outside 2019	The report covers 2019 only	0	Pass
Latest order date	Freshness	28 Dec 2019	Info

How this report is governed

Data quality: all checks pass on the last refresh.

Definition fix: orders are distinct order IDs (187,300), not order lines (191,067). The original report showed lines as orders.

One source: the CSV is read once (Sales_Raw) and the product and city tables are built from it, so they always match the facts.

Freshness: Data refreshed 11 Oct 2026.
