## Budget bands

Listings, share and what a typical listing looks like

| Budget | Listings | Share | Typical m² | Typical listing |
|---|---|---|---|---|
| Under EGP 1M | 492 | 10% | 72 | 1-bed apartment |
| EGP 1–2M | 3,219 | 64% | 127 | 3-bed apartment |
| EGP 2–4M | 832 | 17% | 191 | 4-bed apartment |
| EGP 4–6M | 388 | 8% | 330 | 4-bed villa |
| Over EGP 6M | 69 | 1% | 373 | 5-bed villa |

### What the data says

**64%** of listings sit between EGP 1M and 2M, where a typical buy is a 3-bed apartment of 127 m².

For the same budget an apartment in Alexandria gives **27%** more space than one in Cairo. 3 bed units are the cheapest per m².

## Data quality checks

Run on every refresh

| Check | Rule | Result | Status |
|---|---|---|---|
| Rows in the raw sheet | Informational | 5,018 | Info |
| Duplicate listing IDs removed | Each listing counted once | 12 | Cleaned |
| Rows with no valid area or price removed | Area > 0 and price > 0 | 6 | Cleaned |
| Listings used in the report | After cleaning | 5,000 | Info |
| Listings with unknown district | Every district maps to a city | 0 | Pass |
| Bathrooms above bedrooms + 1 | Plausibility check | 0 | Pass |
| Price per m² outside 3K–40K | Outlier check | 0 | Pass |
| Latest listing date | Freshness | 31 Dec 2023 | Info |

### How this report is governed

**Cleaning in Power Query:** 12 duplicate listings and 6 rows without a valid area or price are removed before any number is shown.

**Price per m²** is total price ÷ total area, so large villas are not under-weighted the way an average of ratios would do.

**Freshness:** Data refreshed 11 Oct 2026.
