Motor Insurance Portfolio

Is the motor book still profitable as claims get more expensive?

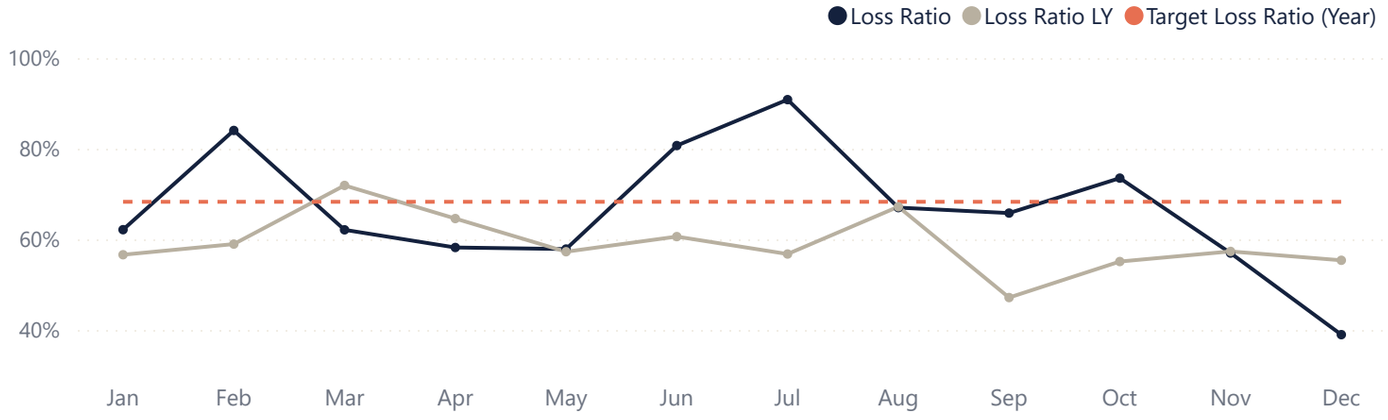

Overview | Claims | Pricing | Retention | Quality

Year: 2025 | Product: All | Channel: All | Region: All

GROSS WRITTEN PREMIUM	EARNED PREMIUM	CLAIMS INCURRED	LOSS RATIO	COMBINED RATIO	POLICIES WRITTEN
EGP 289.8M	EGP 265.4M	EGP 175.5M	66.2%	92.9%	16,074
▲ 21.2% vs last year	▲ 20.8% vs last year	▲ 35.6% vs last year	▲ 7.2 pts vs last year	▲ 7.0 pts · under 100% = profit	▲ 17.6% vs last year

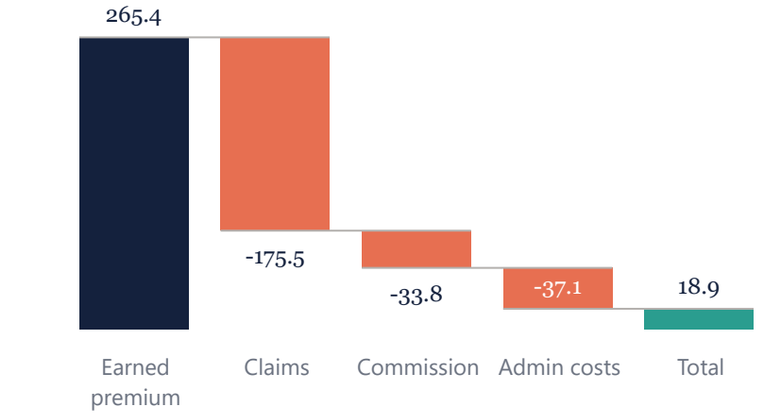

Loss ratio by month

Claims incurred ÷ earned premium, by loss month · dashed = target

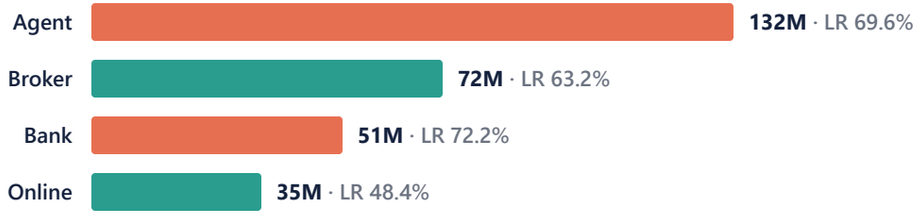

From earned premium to underwriting result

EGP millions

Premium and loss ratio by channel

Written premium, EGP · coral = loss ratio above target

What the data says

The loss ratio is **66.2%** against 58.9% last year: the average claim cost rose **21.1%** while the average premium rose 3.1%.

Combined ratio **92.9%**, an underwriting result of EGP 18.9M. The book still makes money, but the margin is 7.1% of earned premium.

Online policies have the best loss ratio (48.4%); bank policies the worst (72.2%).

Motor Insurance Portfolio

How often do customers claim, and how much does each claim cost?

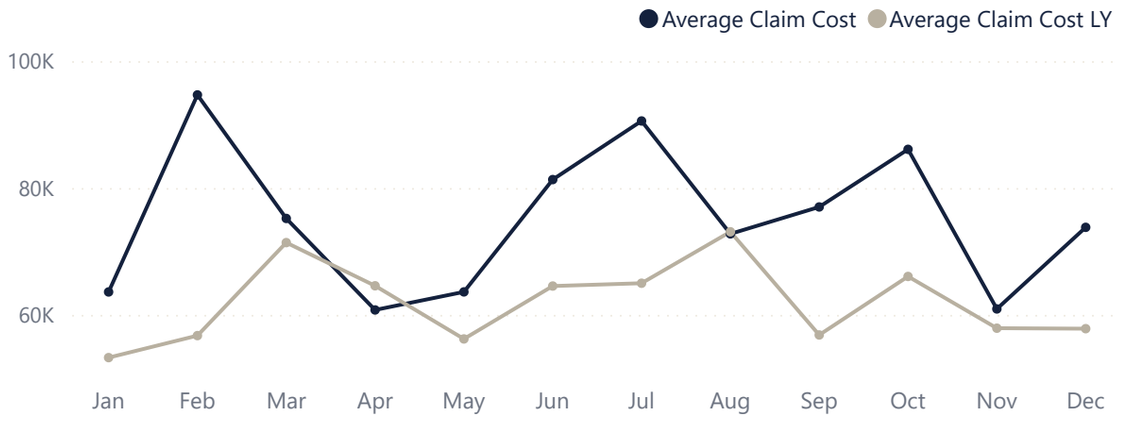

Overview | Claims | Pricing | Retention | Quality

Year: 2025 | Product: All | Channel: All | Region: All

CLAIMS REPORTED	CLAIM FREQUENCY	AVERAGE CLAIM COST	CLAIMS PAID	OPEN CLAIMS	RESERVES
2,344	15.7%	EGP 74.9K	EGP 123.4M	863	EGP 52.2M
▲ 12.0% vs last year	▼ 0.9 pts per vehicle-year	▲ 21.1% vs last year	cash already paid	still being settled	expected to pay on open claims

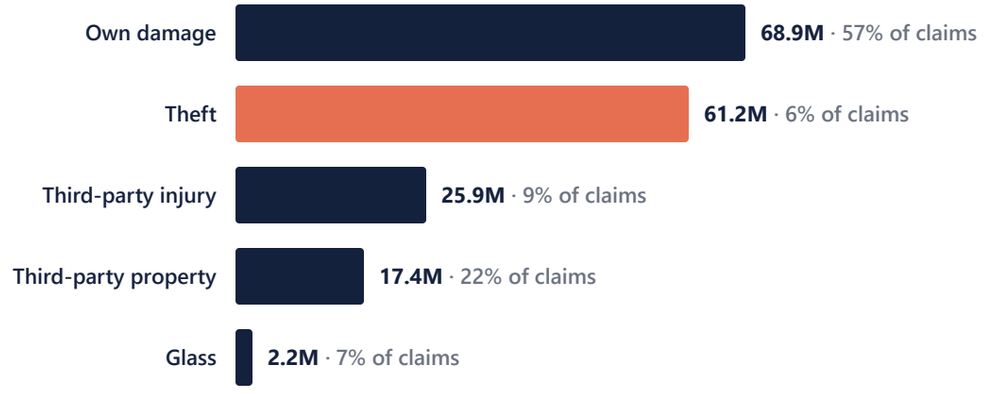

Average claim cost by month

EGP, by loss month

Where the money goes

Incurred cost by claim type · share of claims in grey

Frequency and cost by region

Claims per vehicle-year, average cost and loss ratio

Region	Frequency	Avg cost	Loss ratio
Cairo	17.7%	79.9K	78.8%
Giza	17.3%	80.0K	77.8%
Alexandria	14.6%	62.2K	52.0%
Upper Egypt	14.0%	79.9K	62.4%
Delta	12.6%	63.3K	44.4%
Canal	11.6%	64.9K	42.8%

What the data says

Customers claim **less** often than last year (15.7% vs 16.6% per vehicle-year), and each claim costs EGP 74.9K on average.

Theft is 6% of claims but **35%** of the cost.

863 claims are still open with EGP 52.2M reserved, so this cost can still move.

Motor Insurance Portfolio

Which customers are priced below their risk?

Overview | Claims | **Pricing** | Retention | Quality

Year: 2025 | Product: All | Channel: All | Region: All

AVERAGE PREMIUM	AVERAGE CLAIM COST	LOSS RATIO	TARGET LOSS RATIO	SEGMENTS ABOVE TARGET	RISKIEST AGE BAND
EGP 18.0K	EGP 74.9K	66.2%	68.3%	12 of 25	18-25
▲ 3.1% vs last year	▲ 21.1% vs last year	▲ 7.2 pts vs last year	100% − expenses − 5% margin	driver age × vehicle type	loss ratio 110.7%

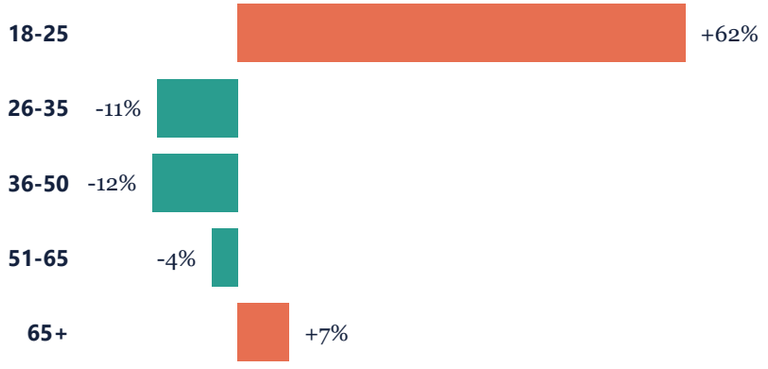

Loss ratio by driver age and vehicle type

Coral = above the target loss ratio · All = whole age band or vehicle type

	Hatchback	Pickup	Sedan	SUV	Van	All
18-25	148.1%	67.6%	81.9%	142.6%	99.3%	110.7%
26-35	73.3%	78.9%	47.8%	70.2%	47.1%	60.6%
36-50	65.2%	38.4%	53.6%	60.9%	115.5%	60.2%
51-65	102.1%	46.2%	78.6%	41.8%	37.7%	66.0%
65+	74.9%	57.7%	64.7%	89.2%	41.3%	73.1%
All	81.3%	56.7%	59.4%	68.9%	75.0%	

Price change needed to hit the target

Loss ratio ÷ target − 1, by driver age

What the data says

Drivers aged 18-25 have a **110.7%** loss ratio: every EGP 100 of premium pays EGP 111 in claims. Their price would need to change by about **+62%**.

Hatchback is the vehicle type with the highest loss ratio (**81.3%**). Premium follows the car's value, but repair costs don't, so cheaper cars are underpriced.

Motor Insurance Portfolio

Who renews, and what do we lose when customers leave?

Overview | Claims | Pricing | **Retention** | Quality

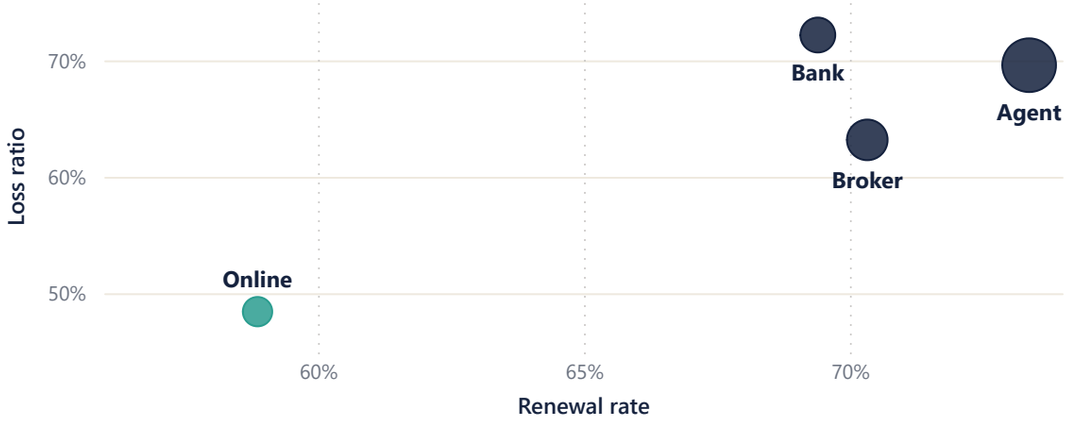

Year: 2025 | Product: All | Channel: All | Region: All

Sample data · valued 31 Dec 2025 · EGP

RENEWAL RATE	POLICIES DUE	RENEWED	LOST CUSTOMERS	PREMIUM LOST	RENEWAL AFTER A CLAIM
70.5%	13,685	9,648	4,037	EGP 71.6M	54.0%
▲ 0.3 pts vs last year	expired in the period	new policy for the same customer	did not renew	last premium of lost customers	vs 73.3% with no claim

Loss ratio vs renewal rate by channel

Bubble size = written premium · left and low = profitable but customers leave

Renewal rate by driver age

Policies that expired in the period · coral = 5+ pts below average

Renewal after a claim

Policies that expired in the period

What the data says

70.5% of customers renewed. The 4,037 who left took **EGP 71.6M** of premium with them.

Online customers are the most profitable (loss ratio 48.4%) and renew at **58.9%** against 70.5% overall.

After a claim, 54.0% renew, against 73.3% with no claim: the claims experience is a retention issue too.

Claims with unknown policy	Every claim matches a policy	0	Pass
Negative paid amounts	Paid ≥ 0	0	Pass
Renewals of unknown policies	RenewalOf exists in Policies	0	Pass
Latest loss date	Freshness	28 Dec 2025	Info

How this report is built

Earned premium spreads each policy's premium over the days it covers, so a policy written in December adds only a few days to that year.

Loss ratio = claims incurred (paid + reserves) ÷ earned premium, by loss date. **Combined ratio** adds commission and a 14% admin cost assumption.

Target loss ratio = 100% − expense ratio − 5% profit margin.

Renewal rate counts policies that expired in the period and were replaced by a new policy for the same customer.

Security: the Branch Manager role shows each manager only their region (ManagerEmail in Dim_Region = USERPRINCIPALNAME).

Sample data: a fictional insurer, generated with a fixed seed. Valued 31 Dec 2025. Data refreshed 11 Oct 2026.
