NILESTAR AUTO GROUP
Aftersales performance

01 Business Overview

DECISION

Where should aftersales focus in 2025 to grow gross profit?

WHAT WE FOUND

Net sales grew **28%** while workshop visits fell **11%**. The average workshop invoice rose 33%, so the growth came from prices, not more cars. Labour is 12% of sales and **30%** of gross profit. Gross profit reached 82% of target.

RECOMMENDATION

Win back workshop visits before pushing parts volume: every lost visit takes labour, the most profitable line, with it. Bring the discount rate back to 7.1% from 8.8%.

02 Geography

DECISION

Where are owners not coming back to us, and where do we need a new branch?

WHAT WE FOUND

Outside Upper Egypt about **31%** of our cars on the road come to the workshop each year; in Upper Egypt only **16%**. Minya, Qena, Sohag have 3,348 of our cars and no branch, and 12% of them visit. Assiut, the only branch in Upper Egypt, sells 105% of its technician hours.

RECOMMENDATION

Plan a service point in Minya and add technicians in Assiut, which is already full. Owners far from a branch are the largest group we are not serving.

DECISION

Which branches need more capacity, and which need a turnaround?

WHAT WE FOUND

Assiut sells **105%** of its technician hours: it is full and turning work away. Borg El Arab sells **46%** and loses EGP 2.4M. 5 of 13 branches lose money after overheads. Online parts orders grew 349% but are 0.4% of sales.

RECOMMENDATION

Add technicians or a second shift in Assiut. At Borg El Arab, move technicians to busier branches or cut fixed costs before adding anything else.

04 Sales Rep 360

DECISION

Which reps need coaching, and on what: volume, discounts or margin?

WHAT WE FOUND

Ali Gamal reached **98%** of target (parts sales median 102%) with a **23.5%** average discount against a 9.1% median. Gross margin is 3.7%, against 18.8% for the role.

RECOMMENDATION

Coach on pricing, not volume: hold discounts to the role median. At the median, the same sales would have earned about EGP 3.5M more.

05 Customer Insights

DECISION

Which customers are we losing, and who should we call first?

WHAT WE FOUND

Owners keep coming while the car is under warranty (**79%** come back the next year). After the 3-year warranty ends, only **41%** do. 2,259 owners of 3 to 5-year-old cars did not come back this year; they spent EGP 37.2M with us last year.

RECOMMENDATION

Call the list below first, highest spenders first, and offer a fixed-price service plan before the warranty ends, not after the owner has gone.

06 Financial Watch

DECISION

Where is margin leaking: discounts, overheads or late payments?

WHAT WE FOUND

Net sales rose 28% but operating profit fell **28%**, to EGP 23.7M. Discounts took EGP 45.9M and overheads ran **5.6%** over budget, mostly salaries and utilities. Customers owe EGP 50.9M; insurance and government hold most of the 4.6M that is more than 90 days late.

RECOMMENDATION

Bring discounts back to last year's rate (worth about EGP 8.6M). Hold salaries and utilities to budget. Chase insurance and government before extending more credit.
